About Me:

I am a web developer specializing in PHP/Laravel and JavaScript/Vue.js. I design and build scalable back-end systems and dynamic front-end interfaces, integrating technologies to create robust web solutions.

I have expertise in web accessibility, ensuring compliance with WCAG guidelines, and experience with Salesforce integration to streamline data workflows. Additionally, I excel in WordPress development, including custom theme and plugin creation.

My focus is on delivering high-quality, user-centric websites and applications that meet and exceed client expectations.

WORK EXPERIENCE:

Learnewable – *Web Developer*

November 2023 – June 2024

- **Designed and developed** robust back-end infrastructure using PHP and Laravel, ensuring scalability and efficiency.
- **Leveraged AI** technologies to analyze and process large datasets, providing actionable insights and enhancing data-driven decision-making.
- **Collaborated closely** with front-end teams to create seamless interfaces, integrating the back-end with JavaScript/VueJS frameworks for a cohesive user experience.

Anderson Business Advisors – *Web Developer*

March 2022 – November 2023

- **Engineered a backend API** in PHP/Laravel to seamlessly integrate company Salesforce data with the Client Portal, enhancing data accessibility and workflow efficiency.
- **Developed and enhanced** Client Portal and Intranet functionalities using VueJS integrated with WordPress, delivering a user-friendly and responsive interface.

Growth Dynamics – *Web Developer*

March 2021 – March 2022

Email: Nolan.daigle@gmail.com
Phone: 949-554-8057

- **Develop web applications** utilizing HTML/CSS, JavaScript/VueJS, and PHP/Laravel to build responsive and accessible websites and web applications.
- **Developed and managed client sites** in WordPress, including the creation of custom plugins to assist developers with web accessibility.
- **Remediated and audited websites** according to WCAG guidelines, ensuring compliance and enhancing inclusivity.

CitizenPath – *PHP Developer*

Dec 2018 – May 2019

- **Developed and implemented** programs to efficiently process immigration documents for legal filing, streamlining workflows and ensuring accuracy.
- **Created and customized** WordPress themes and functionalities to meet specific client needs, enhancing user experience and site performance.

Self-employed – *Freelance Web Developer*

May 2017 – Current

- **Build and customize websites** using WordPress, HTML, CSS, JavaScript, and PHP, tailoring each site to client specifications and needs.
- **Collaborate with clients** to design and develop web content that aligns with their vision and objectives, ensuring a user-centric approach.
- **Maintain and update** client websites, providing ongoing support and enhancements to ensure optimal performance and relevance.
